Rockery Plant Suggestions at Miethke's

Plants Are No Better Than Their Roots

Strong Root Development

Under Mr. Miethke's supervision and careful direction, a root system has been perfected and adhered to which assures a sturdy and beautiful growth. The soil at the Miethke Nurseries is particularly suited to strong root development, and stock grown in it is as nearly perfect as it is possible to be.

The Miethke Nursery stands back of all stock grown at their place, and will make good any loss due to injuries that may occur from their handling of it.

As a tree, shrub, or plant is no better than its roots, it is highly important that the roots should have scientific care and supervision during the early stages of growth. The Miethke root system has been one of the biggest factors in the success of the Miethke Nursery and is assurance that anything you get from us is fully warranted as a strong and healthy plant.

High Grade Stock

A steadily increasing trade of discriminating buyers and lovers of flowers, trees and shrubs, who know values, is a sure indication of the high quality of our stock.

To those who are not familiar with Miethke policies, and who may not have dealt with us in the past, we wish to emphasize the fact that nothing but the very best and finest of nursery stock is grown by us and everything that we offer to our customers is the very best that long experience in this business can make it.

Visitors to the Miethke Nursery marvel at the beauty of our fields and often drive out just to revel in the lovely masses of color when flowering plants are in bloom. Visitors are always welcome at our nursery and we extend a cordial invitation to come and inspect our stock at any time.

INTRODUCTION

The following pages contain only a partial list of the hundreds of varieties of Trees, Shrubs and Plants to be had from our nursery.

Owing to the ever-increasing demand for rockery plants, we are designating the most suitable plants and shrubs with a *.

BROAD LEAVED EVERGREENS

*Abelia Grandiflora—Graceful pink flowering.
*Andromeda Floribunda—Lily of the Valley shrub.
Aralia Sieboldii—Very large glossy foliage.
Aucuba Japonica—Japanese Laurel, red berried.
" " Variegated—Green with golden spots.
Azalea Amoena—Japanese evergreen, Cerise red.
" Ledifolium Album—Large white flowering.
" " Purpureum—Large lavender rose.
* " Hiniodigiri—Bright scarlet Japanese.
* " Macrantha—Bright pink Japanese.
Bamboo, Japanese—Both dwarf and tall varieties.
Bay Tree—Laurus Nobilis.
Berberis Darwinii—Small holly leaved.
* " Dulcis—Small oval leaved.
* " " Nana—Dwarf, for borders and rockeries.
" Hookerii—Larger leaved.
* " Sanguinea (New)—Fine light green foliage.
" Stenophylla—Dark narrow leaved.
* " Verruculosa—Semi-dwarf, very good.
" Gagne Payne—Long narrow leaved.
" Sargentea—Large leaved with long thorns.
Boxwood Dwarf—For borders, boxes and rockeries.
" English—For hedges (best for trimming).
" Golden—Golden variegated foliage.
" Silver—Leaves have white variegations.
*Cotoneaster Adpressa—Of slow spreading growth.
" Franchetii—Upright with graceful arching branches.
* " Henryana—Low drooping habit.
* " Humifusa—Prostrate trailing for banks and rockeries.
* " Microphylla—Sprawling, dark green glossy foliage.
* " Thymifolia—Dwarf type, very small dark green foliage.
" Pannosa—Upright, a slender graceful shrub.
" Salicifolia Flocosa—Drooping spreading habit.
" Simonsii—Upright growing, light red berries.
* " Whelleri—Spreading habit, dark red berries.
* " Congesta—Best Rockery variety, very fine.

All the Cotoneasters have red berries of various sizes and shades.

* Indicates suitable Rockery Plants.

1930

MIETTAKE'S NURSERY TACOMA WASH.

*Daphne Cneorum—Low spreading, very fragrant pink flowers.
" Odora—Waxy light green leaves, fragrant pink flowers.
*Eleagnus Pungens Aurea—Low growing pretty variegated foliage.
Escollonia Rubra—Pretty green foliage with clusters of red flowers.
Evonymus Japonica Alba—Glossy green foliage edged with white.
" " Aurea—Glossy green foliage edged with gold.
* " " Microphylla—Small green foliage.
* " Radicans—Trailing, with deep green foliage.
* " Radicans—Trailing, with white variegations.
* " Kewensis—(Rare) with very small leaves.
* " Colorata—Large leaf which turns bronze in winter.
* " Vegatus—Round dark green leaves.
* " Rosmarinifolius—Narrow leaves turn bronze in winter.
Holly English—Large leaved and large berried.
" Dutch—Smaller smooth foliage, smaller berries.
" Golden—Leaves have golden variegations.
" Silver—Leaves have silver variegations.
*Hypericum Moserianum—Has large yellow flowers all summer.
" Aureum—Tall variety, smaller yellow flowers.
Kalmia Latifolia—Eastern Mountain Laurel, has pink flowers.
" Augustifolia—Smaller type, with pink flowers.
" Polifolia—Glossy narrow foliage, deep pink flowers.
*Kinnikinnick—Glossy evergreen leaves, bright red berries.
Laurel English—Large glossy leaves, green.
" Portugal—Dark glossy green leaves, narrow.
* " Camelliaefolia—Smaller leaves and of dwarf habit.
Laurustinus—Winter flowering, red buds opening to white flowers.
Leucothoe Catesbaei—Flowers are white and are similar to lily-of-the-valley.
Lonicera Nitida—Small deep green foliage, trims well.

Mahonia Aquifolium—Yellow flowers, followed by blue berries.
" Japonica—Heavy foliage with yellow variegations.
*Japanese Spurge—Best evergreen ground cover for dense shade.
Nandina Domestica—Heavenly Bamboo, foliage turns red in winter.
Privet Amurense—Small leaves, white blossom.
" Golden—Golden variegated.
" Lodense—Dwarf, of very dense growth.
" Lucidum—Waxy leaves, one of the best.
*Pyracantha Lelandi—Fire bush, orange red berries.
" Coccinea—This variety has bright red berries.
Raphiolepis Ovata—Leathery foliage, clusters of pinkish flowers.
Rhododendron Pink Pearl—Finest light pink.
" Alice—Clear deeper pink.
" Ponticum—Lavender purple.
" Californicum—Pink flowers of medium size.

* Indicates suitable Rockery Plants.

Rhododendron Cunninghami—Dwarf type with pale pink flower.
* " **Wilsoni**—Dwarf type with small pink flower. [and purple berries.
Skimmia Japonica—Dwarf broad leaf, with clusters of red berries.
Viburnum Rhytidophyllum—Large deeply wrinkled leaves.
***Yucca Filamentosa**—Leaves long and narrow, creamy white flowers.
" **Recurva Glauca**—Foliage is of a bluish green color.
***Pernettya**—One of the choisest Berried Plants. Pink, red, white

CONIFER EVERGREENS

Araucaria Imbricata—The Monkey Puzzle Tree.
Abies Concolor—Rocky Mountain Silver Fir.
" **Arizonica**—Cork Bark, Blue Fir.
" **Cephalonica**—Fir, has stiff light green needles.
" **Douglasi**—Blue Mountain Fir.
" **Pinsapo**—Spanish Fir, very distinctive.
" **Firma**—Japanese Fir of very slow growth.
Cedrus Atlantica—Of open pyramidal growth.
" **Deodara**—The most graceful of the Cedrus.
" **Libani**—Cedrus of Lebanon.
Cephalotaxus Drupacea—False Yew, leaves are heavy light green.
" **Fortunei**—Growth similar to the Irish Yew.
Cryptomeria Elegans—Soft feathery foliage turns bronze in winter.
" **Japonica**—Of heavy growth similar to the Redwood.
" **Elegans Compacta**—Dwarf type with finer foliage.
* " **Lobbi**—Dwarf, compact grower.
Cypress Alumnii—Slender growth, silver blue foliage.
" **Arizonica**—Habit much like Italian, but more spreading.
" **Erecta Viridis**—Bright green, heavy pyramidal shape.
" **Italian**—Of tall narrow growth.
" **Lawsoniana**—Of rapid growth, shades run from blue to [green.
" **Silver Queen**—Graceful spreading tree, silver foliage.
Cunningham Chinensis—Like the Monkey Puzzle but more graceful
Cypress Golden Hybrid—Slower growing type, golden foliage.
" **Versicolor**—Golden variegated, spreading habit.
* " **Minima Glauca**—Very dwarf, stiff and compact.
" **Monterey**—Fast growing, of a bright green color.
" **Nedifera**—Very dwarf growing, with drooping branches.
* " **Nestoides**—Dwarf very graceful, spreading.
" **Ceorulea**—Of slender growth, silvery blue foliage.
" **Nutkaensis**—Of drooping habit, deep green.
" " **Glauca**—Same habit, silvery foliage.
" " **Glauca Nana**—Dwarf, dense growing type.
" **Wisseli**—A novelty of slender graceful habit.

* Indicates suitable Rockery Plants.

Hemlock, Tsuga—One of our most graceful native trees.
***Juniper Canadensis**—Of low spreading habit, silvery green.
* " " **Aurea**—Golden type of above.
" **Chinensis**—Silvery foliage of upright growth.
" " **Variegata**—This variety has white variegations.
* " " **Procumbens**—A prostrate form of green type.
* " " " **Alba**—This is the white variegated [prostrate.
* " " " **Aurea**—The golden variegated [prostrate.
* " **Pfitzeriana**—Silver green, low spreading.
* " **Sabina**—Semi-prostrate type with deep green foliage.
* " " **Variegata**—The variegated type of the above.
* " **Tamarisifolia**—Gray Carpet juniper.
" **Communis**—Silvery colored European Juniper.
" **Irish**—Silvery gray columnar form.
" **Scopulorum**—Rockery Mountain silver juniper.
" **Swedish**—Silvery foliage, deep blue berries.
" **Virginiana**—Upright growth, short needles, bronze in [winter.
" " **Glauca**—Bright silver blue foliage.
" " **Smithii**—Bright green foliage all winter.
* " " **Leeii**—Spreading, graceful with golden variega- [tions.
" **Libertonia**—Best silver colored Juniper.
" **Wislenbergia**—Spreading Juniper of graceful habit.
* " **Kosteriana**—Creeping form of deep green color.
" **Stricta**—Bluish foliage, compact habit.
Libocedrus Decurrens—Flat leaves are very fragrant.
" " **Compacta**—Dwarf form of the above.
Pine Austrian—Heavy grower with long needles.
* " **Dwarf Mugho**—Low, compact growing.
" **Japanese Red**—Of medium growth with slender needles.
" **Japanese Umbrella**—Heavy needles in whorls, similar to an [umbrella.
Retinospora Ericoides—Soft green foliage, bronze in winter.
" **Thyoides Aurea**—Of loose growth with golden varie- [gations.
" **Filifera**—Japanese thread branched cypress.
" **Filifera Aurea**—Golden form of the above.
" **Obtusa**—Deep green, flat branches.
* " " **Gracilis**—More graceful type of above.
* " " " **Aurea**—A golden form of the above.
* " " **Nana Nana**—Very dwarf type of Obtusa.
" " **Columnaris**—Of columnar growth.

* Indicates suitable Rockery Plants.

Retinospora Plumosa—Japanese plume cypress.
" **Plumosa Aurea**—Golden form of the above.
" **Plumosa Aurea Nana**—A dwarf of the above type.
" **Pisifera**—A more open growth with drooping tips.
" **Pisifera Aurea**—Same as above with golden foliage.
* " **Squarrosa Nana**—Dwarf, compact habit, soft blue green color.
" **Squarrosa Veitchii**—Larger growing variety.
Spruce Excelsa—Norway Spruce, short needle type.
" **Colorado Blue**—Sturdy growing of silvery blue color.
" **Polita**—Tiger Tail Spruce, very stiff and pointed needles.
" **Oriental**—Very short needled, deep green.
Thuya Lobbii—Wide flat foliage, variegated gold and green.
" **Lycopothoides**—Of upright growth, crested foliage.
" **Occidentalis Globosa**—Very hardy variety of globe shape.
" " **Pyramidalis**—Of compact columnar growth.
" " **Lutea**—One of the best golden colored Thuya.
" " **Ellwangeriana**—Dwarf with soft foliage.
" " **Conica Densa**—Dwarf pyramidal type.
* " " **Little Gem**—Very dwarf of spreading habit.
" **Orientalis**—Finer foliage and lighter color than Occidentalis
" " **Beverlyensis**—Tall growing, golden foliage.
" " **Bonita**—Of compact growth, fine green foliage.
" " **Aurea Nana**—Dwarf, compact golden foliage variety.
" " **Conspicua**—The brightest yellow Thuya.
" " **Pyramidalis**—Of heavy pyramidal growth.
Thuyopsis Dolobrata—Odd branches with scales heavier than Thuya.
Yew English—Dark green foliage of slow growth.
" **English Golden**—A golden variegated variety, red berried.
" **Irish**—Of columnar habit, dark green foliage and red berried.
" **Irish Golden**—Same as above with golden variegations.
" **Japanese**—Foliage of a lighter green and more pointed.
* " **Japanese Golden**—One of the finest golden evergreens.

The Heathers are some of the best of the low growing flowering evergreens.

***Heather Irish Bell**—Deep green foliage, rose lavender flowers all summer.
* " " " **Alba**—White form of the above.
* " **Carnea**—Bright Rose, winter flowering.
* " **Mediterranean**—Early spring blooming, upright growth.
* " " **Hybrid**—Winter blooming, bright pink flowers.
* " **Scotch Vulgaris**—Very hardy, rose purple flowers.

* Indicates suitable Rockery Plants.

*Heather Vulgaris Alba—White flowering variety.
* " " Aurea—Yellow foliage, rose lavender flowers.
* " " Hammondii—White flowering, brightest green foliage.
* " Cornish—Of low compact growth and white flowers.
* " Tetralix—Pink Heather of slow growth.

SHADE AND ORNAMENTAL TREES

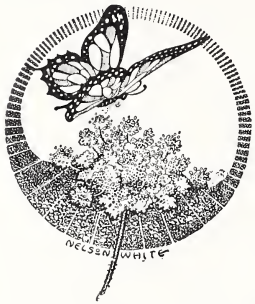
ROSES

The rose is one of the best-liked flowers and deserves a place in every garden. There are so many varieties that do well here that we can get almost any color effect desired. We have all the most popular as well as some of the newest varieties in bush, climbing and standard or tree roses.



HEATHER

The various varieties of Heather are very popular and we grow large quantities of them; some of these bloom in the summer, some in the fall, others in the winter, and by having an assortment of them you will have some in bloom almost continuously.

FRUIT TREES AND BERRIES

Fruit trees make lovely shade trees, especially for the rear yard or lawn. We have a large variety of the best fruit trees and berry plants.

MODERATE PRICES

In addition to shrubs, plants and trees for outdoor landscape gardening, we carry a complete line of POTTED PLANTS and HOT-HOUSE FLOWERS. We also have a large variety of fruit stock. You can always be sure of finding just what you need at Miethke's and we are always willing and glad to help you in making the proper selections. All of our stock is modertely priced and you can obtain anything from a very modest display to a complete planting for a large estate from our nurseries.

We maintain a complete and modern service that you will find extremely helpful in your landscape problems, and will furnish you with estimates of cost without charge.

VISIT OUR NURSERY—HOW TO GET THERE

We are 15 minutes' drive by automobile from Tacoma (straight across the valley; cross the Puyallup river bridge at Cushman Veterans' Hospital and go straight ahead to Evergreen Corners. Don't turn.
